

EZ-Line™

The World's First Retractable Horizontal Lifeline System Provides the Ultimate in Safety, Ease-of-Use & Productivity!

- Retractable lifeline is simply pulled out for installation and retracted with built-in handle to tension the line
- Customise your system length in any increment up to 18 m for complete jobsite flexibility
- Entire system stores in an easy to carry case - no more coils of unmanageable cable!
- Installation, removal and storage is the fastest in the industry, taking only seconds, providing ultimate worker productivity
- Built-in tension and impact indicators take the guess-work out of system set-up and service
- Extremely lightweight system is 33% lighter than conventional 18m systems for increased ease-of-use
- Attaches to any 22 kN rated anchorage connector or stanchion for added versatility
- Provides hands-free horizontal mobility and continuous protection for 2 users per system.
- Meets CE and OSHA requirements

EZ-LINE™ RETRACTABLE HORIZONTAL LIFELINE SYSTEM

Increased Productivity EZ-Line™ is the most user friendly horizontal lifeline system on the market today! Easy to install, remove and store, EZ-Line's innovative retractable design allows the user to quickly and efficiently set-up any length of system in only seconds and dismantle it just as quick. The entire 18 m EZ-Line system is retracted into an easy to carry case which eliminates large and bulky coils of cable that are difficult to set-up, relocate and store.

Additionally, EZ-Line weighs only 11.25 kg which is 33% lighter than traditional systems providing ease-of-use and added worker satisfaction.

Installation is completed in four simple steps;

- 1) Attach the lifeline with the Karabiner to an anchorage connector,
- 2) Depress the locking button allowing cable to pay out and walk to the next anchorage,
- 3) Attach the housing/case with the Karabiner to the anchorage connector,
- 4) Tension the lifeline with the built-in crank handle.

Continuous Protection After installation the worker(s) is able to attach to the cable lifeline with their fall arrest system and begin work, fully protected. EZ-Line™ will provide complete horizontal mobility and hands-free fall protection for up to 2 users per system.

EZ-Line™ incorporates many features increasing jobsite safety. A built-in pre-tension indicator ensures the lifeline is correctly tensioned, minimising dangerous fall clearances.

In addition, the integrated impact indicator provides the user with a visual reference on whether the device has been subjected to a fall. EZ-Line™ is the safest horizontal lifeline system on the market today!

Complete Jobsite Flexibility EZ-Line™ is fully versatile, you choose the system length in any increment up to 18m. The remaining cable is simply left on the drum inside the housing/carrying case. In addition, EZ-Line™ can be anchored to a structure using any 22 kN rated anchorage connector such as fixed beam clamps, tie-off straps and HLL stanchions. EZ-Line™ provides the ultimate in jobsite versatility.

Specifications:

Lifeline: 6.25mm galvanized 6x37 cable, tensile strength of 24.5Kn **Housing:** LLDPE Polyethylene **Karabiners:** Zinc plated steel, 22.2kN minimum tensile strength **Anchorage Handle:** Zinc plated **Capacity:** 2 users per system **Weight:** 11.25Kg **Size:** 30cm x 26.25cm x 18.12cm **Standards:** Meets CE (EN795 - C) and OSHA standards
