GREEN

DESCRIPTION

Modern safety sandals with a composite antipuncture midsole and a composite toe cap, which protects against compression with a force of up to 15 kN or the fall of a load weighing up to 20 kg from a height of 1 m. The antistatic outsole made of a combination of polyurethane and very durable rubber guarantees not only comfort but also safety thanks to the anti-slip properties of the outsole, which is also resistant to oils and abrasion. The upper part is made of genuine leather "NUBUCK" and the inner lining of breathable polyester. The closure with elastic laces allows the shoes to be perfectly adapted to the shape of the foot. Reflective inserts guarantee increased user visibility. This model is equipped with a comfortable inner insole, which thanks to the gel in heel absorbs shocks even better and brings a maximum feeling of comfort during work. These shoes look like sports shoes, but they perfectly protect your feet.
